

UOP FASTFEED™

UOP FastFEED™ solution integrates our basic engineering and modular execution capabilities in detail design, procurement and logistics to provide customers with a defined overall project scope and fixed price estimate for various UOP technologies. Examples are Naphtha Hydrotreaters, Distillate Hydrotreaters, Reforming Units, Isomerization Units, and Ecofining Units.

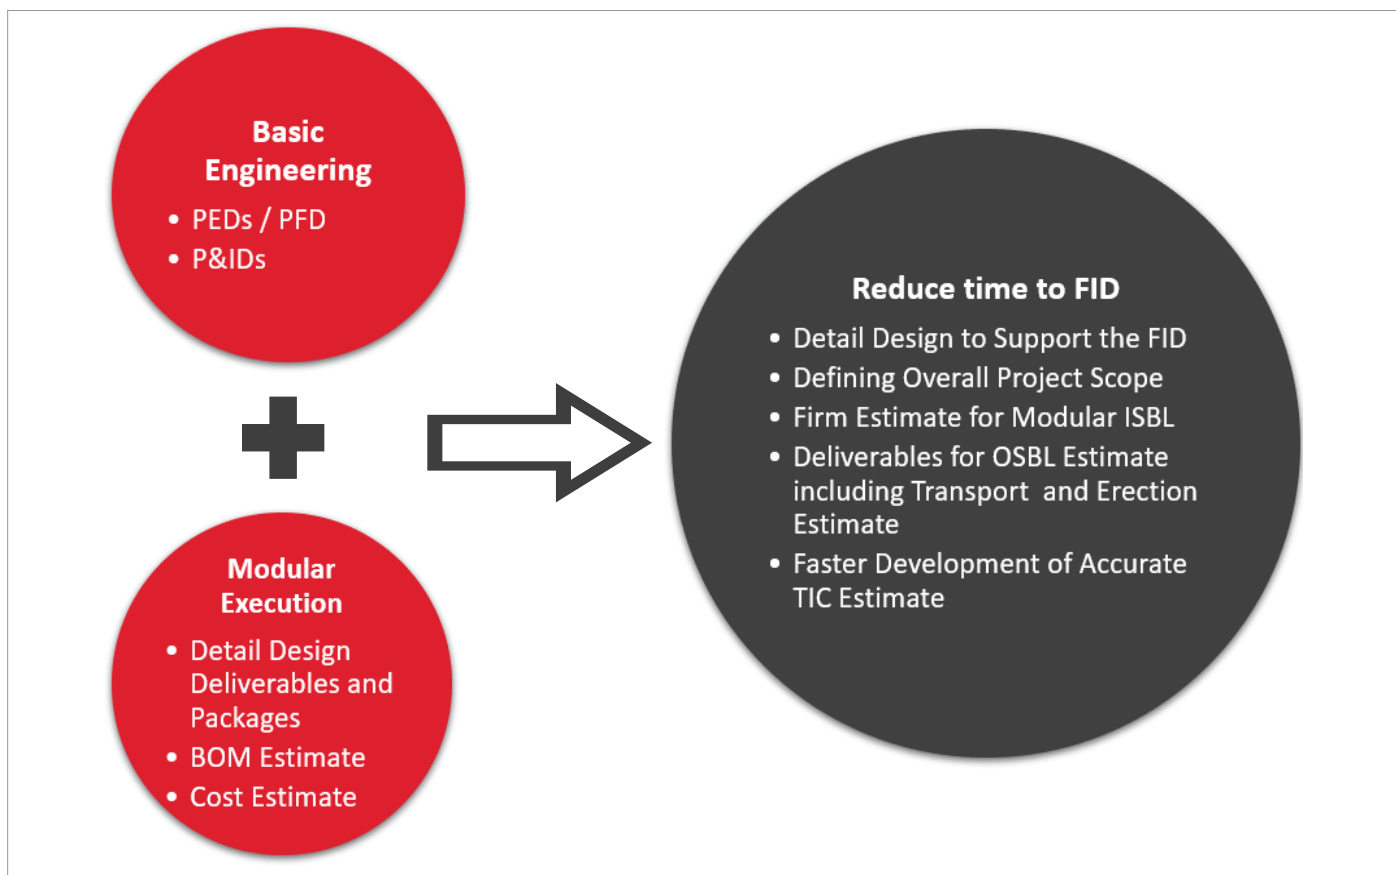

ADVANTAGES

UOP FastFEED allows for parallel execution of activities in the basic engineering and front-end engineering design (FEED) phases resulting in a schedule reduction. A fast-to-market solution enables our customers to achieve earlier financial investment decision (FID) compared to a conventional front end loading (FEL) process.

By leveraging UOP's extensive expertise in these technologies, UOP FastFEED is offered at a substantially lower cost when compared to a conventional FEL process.

TYPICAL UOP FASTFEED DELIVERABLES INCLUDE

- Modular Proposal with Scope Table
- Process Design Package
- Civil and Structural Package
- Piping and Mechanical Engineering Package
- Electrical Engineering Package
- Instrumentation Engineering Package

Cost Certainty

UOP's modular units are offered at firm price

Schedule Certainty

Significant reduction in schedule to achieve FID

UOP FastFEED utilizes Modular execution of process units that enable streamlined site work for faster on-stream performance guaranteed by the technology licensor.

Smoother Site Works

UOP's modular units streamline site work

Single Point Accountability

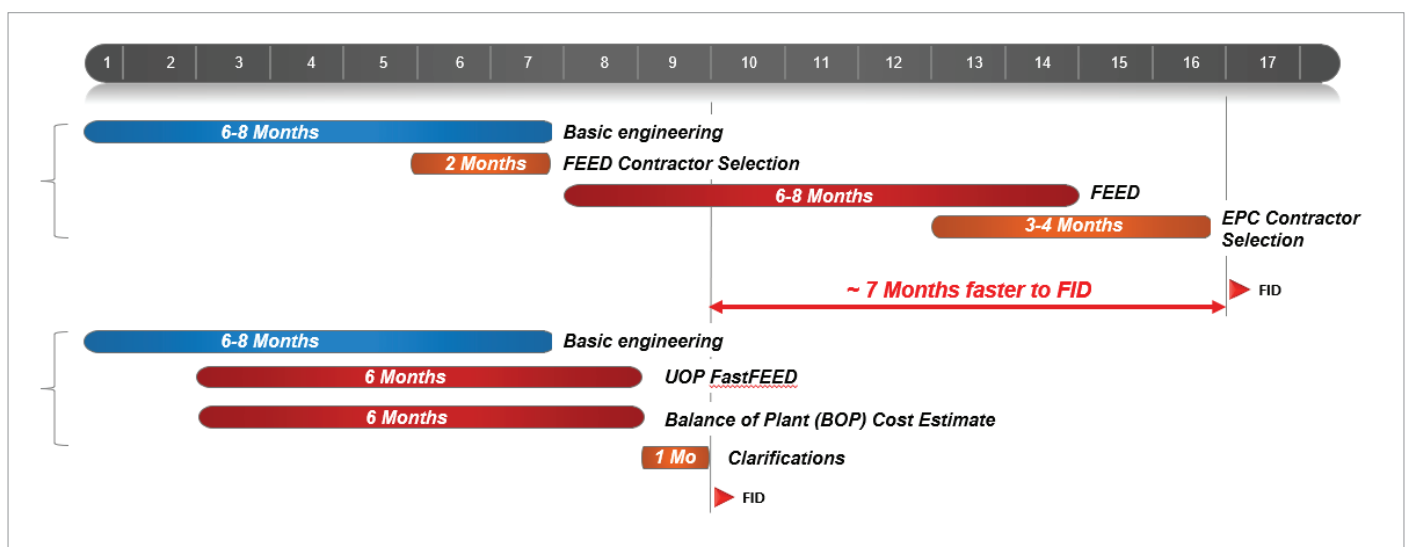

UOP technology using UOP modular process units backed by UOP process guarantees and mechanical warranties

Quality Assurance

UOP modular units offer higher quality than site fabrication

UOP FASTFEED™ ENABLES FAST TO MARKET
